

JOB DESCRIPTION

Pre-Sales Engineer

Responsible to: Solutions Architect

Responsible for: None

Salary £40,000 to £55,000 plus benefits

Overview

We are looking for an enthusiastic, high calibre IT/networking professional to join our dynamic company and develop their skills in pre-sales solution design & support. You will support colleagues and customer with technical queries, gathering requirements, specifying compatible solutions and building low-level bills of materials including appropriate hardware, software, licences and professional services.

You will be able to work in a consultative manner from requirements definition through to high and low-level designs before handing over to implementation. You will continue to be involved with the customer during the implementation phase to facilitate the successful delivery of projects and for any future design issues or support escalations.

You will bring your experience in network implementation & infrastructure management, your skills in building network designs and use your excellent people & communication skills using them in a pre-sales role, supporting the sales team in designing and presenting solutions to customers.

You will be supported in your development with training from vendors including HPE/Aruba, Juniper & Fortinet. As you progress in the role, you will take more of a lead in complex solution designs and providing written input for tender responses. You will work collaboratively as part of an experienced presales team and able to draw on technical and other expertise across the business as required.

A large proportion of TNP's customer-base is public sector, currently offering services to local authorities, health, emergency services and education, including provision of managed Wide Area Networks, Local Area Networks, Wireless LAN and Security. Therefore, a candidate with experience of working in, or for, the public sector would be advantageous.

MAIN FUNCTION

To support sales & solutions teams in specifying, designing & presenting network and security solutions.

You will be able to use your knowledge of current networking & security technologies to provide design and cost inputs to bids and existing customer reviews. You will have a consultancy-led approach and excellent customer-facing skills. You will maintain excellent links with suppliers & vendors to understand their product portfolio and roadmaps.

SPECIAL CONDITIONS

The successful candidate will be required to complete a Basic DBS check and provide 3 years pre-employment details.

The role may require occasional UK travel to attend customer meetings or vendor events which may require overnight stays and occasional work outside of business hours.

This post requires the ongoing possession of a full, UK valid driving licence, a car allowance is not provided, however mileage expenses are paid.

CONTACTS

Name/organisation	Reason	Approximate Frequency
Solutions Architect or nominated representative.	Day to day management, directions & instructions. Coaching, technical architecture support & direction	Daily
Sales Teams	Co-operative liaison throughout the sales cycle	Daily
TNP Internal	Team work	Daily
